## AEROPAX

### PASSENGER SAFETY, SECURITY AND COMFORT

AEROPAX is an internationally patented innovation, a deployable tunnel designed to improve and manage airplane passenger boarding and disembarking.

AEROPAX is the obvious solution to improve the quality of passenger service and offer better safety, security and comfort :

#### SAFETY

Efficiently manage the movement of passengers from the plane to the airport terminals. There is no possible access to the runway area.

#### SECURITY

Reduce passenger accidents with airport machines on the runway area (trolleys, cables, cars, trailers, etc.).

#### COMFORT

Protect passengers from bad weather. Welcome passengers in a bright tunnel.

#### Extremely simple to operate and use :

- Quick deployment in under a minute up to 90° radius.
- Remote control radio guides the tunnel from the front.
- Battery powered.
- Fold-away so easy to store.

#### French manufacture :

AEROPAX is made in France with the quality and expertise of an ISO 9001 and ISO 14001 certified company.

The tunnel's manufacture is perfectly adapted to airport requirements :

- Height 2.20m ; width 2.60m.
- Wide enough for two passengers to pass with their carry-on luggage.
- Extremely resistant aluminium structures.
- Fire-proof canvas.
- LED lighting.
- Emergency exits.
